PC 2015
FLOW THROUGH VALVE FOR
10 oz. CO2 BOTTLE

This valve is designed to fit into most 7 oz. or 10 oz. CO2 bottles having 5/8 " - 18 UNF-2B straight threads. The outlet is a conventional CGA320 thread for CO2 gas. Valves include a safety release disc. Assure "O" ring is in place, then install valve into your cylinder and tighten to 50 ft lbs. Do not use sealer or lubricant on threads.

Please verify bottle thread size before installing valve. Use caution to avoid cross threading when installing the valve into the bottle or when installing your regulator onto the valve. A valve with damaged threads is not returnable.

? QUESTIONS ?

If you have any questions or concerns on the installation or use of this product, DO NOT contact the retailer you purchased the kit from. Most retailers are not equipped to help with in-depth tech questions.
