PC 750
12 Volt 3 Way Air/CO2 Shut Off Valve
MAXIMUM PRESSURE 125 PSI
All Ports are 1/8" NPT

Attach Port #1 to the LOW pressure side of your regulator using the supplied 1/8" nipple. If your regulator "out" port is 1/4" NPT an adapter is supplied. The fitting supplied in port #2 is a quick connect fitting for most 1/4" air line. Simply push your line all the way into the fitting to install. To remove your line hold in on the flange and pull the line out.
Use teflon tape or thread sealer on all connections.
Connect one wire to a good chassis ground and the other to your switched power supply. When power is turned off, air flow will be turned off. When power is supplied, air flow will be turned on.

? QUESTIONS ?

If you have any questions or concerns on the installation or use of this product, DO NOT contact the retailer you purchased the kit from. Most retailers are not equipped to help with in-depth tech questions.
